FG-SERIES
PROFESSIONAL HOLLOW CORE FIBERGLASS POLES

FG-SERIES HOLLOW CORE FIBERGLASS POLES
Preferred for Tree Trimming and Aerial Construction

Jameson's strongest and most popular pole is lighter than the JE series, offering greater control and exceptional bending strength.

- Polymer protective surface veil prevents fiber blooming at surface due to abrasion or ultra-violet light.
- Preferred choice for telecommunication linemen, arborists and landscapers.
- Extension poles are equipped with a male ferrule on one end and a female ferrule on the opposite end.
- .125" Wall Thickness, 1.25" Pole Diameter, 2.4 lbs. (Based on 6' extension pole).

Batch tested to 100KV per foot for five minutes
