

PR2300 Media Panel

The SOHO Pro PR2300 Brownfield media panel provides a centralized distribution point for the components and services that make today's homes smart.

In addition to the panel's flexible design, a selection of mounting systems makes this panel a convenient, secure, enclosure for installing and distributing broadband service inside the premise.

Freestanding or wall-mounted, the installer-friendly PR2300 is ideal for fiber retrofits where no existing in-wall solution exists.

It can be preloaded for quick plug-and-play installation with Primex keystones (Cat5e, Cat6/6a, coax, fiber).

Free Standing

Wall Mount

Features & Benefits

- Holds all the cabling and active (modem, ONT, USP), and passive (cable management clips/spools, modules) components in a compact, stylized housing
- Quick and easy component installation using Primex's patented Rail Mounting Brackets
- Easily centralize smart home services anywhere within the residence via wall mount or free-standing placement
- Low-profile, aesthetically-pleasing design blends with decor
- Protective, decorative fins prevent customers from placing spillables on top of enclosure
- Keystone adapters on sides allow for simple network plug and play functionality
- Passive cooling via venting ensures equipment remains within operating temperature limits
- Easy access lids feature snap-in handles that blend into the design and add venting. Simple locking mechanism on the handles limits end-user access
- UL/cUL listed
