

## FiberRunner® Channel, 6x4, Yellow

FR6X4YL6

The FiberRunner® 6x4 Channel can be used with fittings and brackets to design a routing system to separate, route, and protect fiber optic and high-performance copper cables. The cable routing channel accepts cable retainers or a hinged cover.

### Specifications

|                      |                                                                                                                                                                                                                                                                |
