"SCREWLESS"

BASEBOARD CLIPS

SI-099X SERIES

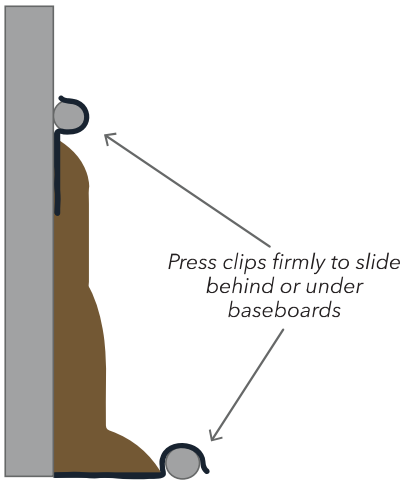

MNS "Screwless" baseboard clips have been specifically designed to facilitate and enhance the installation of indoor coaxial cable, telephone wire, or Category 5 communication wire at a subscriber's home. These SI-099X Series Clips slip easily behind baseboards to firmly secure cables along walls and carpeting. They avoid crushing or nicking of the cables commonly caused by conventional cable clips using screws, nails or staples.

Barbs can be flattened allowing clips to be removed and reused

Features

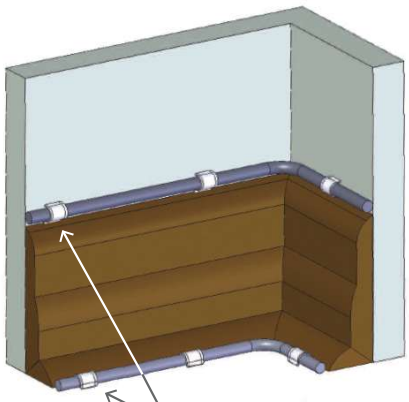

- Made of high quality steel with high impact, baked enamel finish
- Clips incorporate two barbs for a permanent installation
  - Can be easily flattened with pliers to remove and treuse clips
- Clips are available for RG 6 indoor coaxial cable, telephone wire or Category 5 communication wire
  - Availiable in black, white or ivory
- Ensures proper installation every time

Press clips firmly to slide behind or under baseboards

Installation

1. Mount clip on indoor cable
2. Position clip and cable flush to wall or carpeted surface
3. Press firmly with thumb to pierce any paint and slide clip behind baseboard
4. Space clips properly to secure cable uniformly along walls and carpet

Use clips along walls or carpeting

Ordering Information

SI-0991-X "Screwless" RG 6 Cable Clip
